

Share Design Ideas for the Noyo Center!

The City of Fort Bragg, working in partnership with Sonoma State University, is having initial designs prepared for a marine science/education center for a portion of the Mill Site property. The proposed Noyo Center will serve as a cold water marine research center for the State college system and a nature center with marine exhibits and talks for residents and visitors. The City has hired the team of Bauer & Wiley and Jones & Jones to design the facility. These experienced architectural firms designed the Ocean Institute at Dana Point. The City is sponsoring two public design events for the community to inform the project design.

Noyo Center Design Input **Monday, June 7, 7:00 ~ 8:30 pm** **Town Hall**

An informal open house for you to learn about the project, exchange ideas, and provide input to the design team about the Noyo Center's amenities, activities, look and feel.

Noyo Center Design Review **Thursday, June 10, 7:00 ~ 8:30 pm** **Town Hall**

An informal open house and an opportunity to look at and comment on the draft designs created during the four-day Noyo Center Design Charrette (which will not be open to the general public).

This project is funded by a California Sustainable Communities Grant.
